A message of His Excellency The Acting President of the University

Prof. Ali Mohammed Masmali
Acting President of the University

In light of the Kingdom of Saudi Arabia's ambitious national directions led by Saudi Vision 2030, and under the generous patronage of His Majesty the Custodian of the Two Holy Mosques, King Salman bin Abdulaziz, and His Royal Highness the Crown Prince, Mohammed bin Salman bin Abdulaziz – may God preserve them – King Saud University (KSU) plays an active role in supporting comprehensive development and strengthening its contribution to addressing global challenges. As one of the Kingdom's leading higher education institutions, KSU actively integrates the Sustainability concepts into its academic, research, and operational systems, ensuring alignment between educational outcomes, scientific research, and the requirements of sustainable development. The University also places increasing emphasis on advancing key priority areas, including renewable energy, artificial intelligence, and biotechnology, while working to create a Sustainable campus environment that enhances quality of life and promotes responsible environmental practices. In line with its societal responsibility, the University is committed to implementing a wide range of awareness programs and cultural and health initiatives that enhance its positive impact on society and contribute to achieving the Sustainable Development Goals, in alignment with Saudi Vision 2030 and in accordance with global best practices.

A message of His Excellency Head of Sustainability Committee

Prof. Abdulaziz Jarallah Aldegheishem
Head of Sustainability Committee

Based on King Saud University's pioneering role in supporting sustainable development initiatives and its institutional commitment to keeping pace with global trends, this second edition of the report reflects the university's progress and the advancements made in integrating sustainability principles into its academic, research, and operational systems, thereby strengthening its contribution to achieving the United Nations Sustainable Development Goals.

This report highlights the updates and expansion witnessed by the University in its sustainability-related initiatives and programs, alongside the development of institutional work mechanisms and enhanced integration across various entities, contributing to a more comprehensive and effective sustainable impact at both local and international levels.

The report also reflects the maturity of the university's corporate governance in the field of sustainability, through the pivotal role of the Standing Committee for Environmental Sustainability and Renewable Energy and its specialized subcommittees. These committees have contributed to unifying and integrating efforts across the university's various sectors and improving the efficiency of planning and implementing sustainability initiatives.

Recognizing that sustainability is an ongoing approach that requires innovation and development, the university affirms its commitment to enhancing its sustainable practices and adopting innovative solutions that support achieving a long-term positive impact, contributing to the goals of Saudi Vision 2030, and keeping pace with the best global practices in this field.

Executive Summary

This report presents the efforts of King Saud University in inspiring and advancing the Sustainable Development Goals through a wide range of academic, research, and community initiatives and activities.

The University seeks to achieve integration between education, scientific research, and community service in order to attain sustainable development and generate a positive impact at both national and international levels.

Through its research centers and specialized institutes, KSU also works to develop innovative solutions to address environmental, economic, and social challenges, thereby contributing to the achievement of Sustainable Development Goals at both local and global levels.

This report represents an important step toward documenting the University's efforts and strengthening transparency in presenting its sustainability initiatives and achievements.

The University has achieved notable progress in several sustainability areas, most notably:

Supporting scientific research in renewable energy and environmental sustainability.

Enhancing the quality of education and developing academic programs.

Launching community initiatives to support vulnerable groups and improve quality of

Implementing awareness programs in health and environmental fields.

Developing sustainable infrastructure across the university campus.

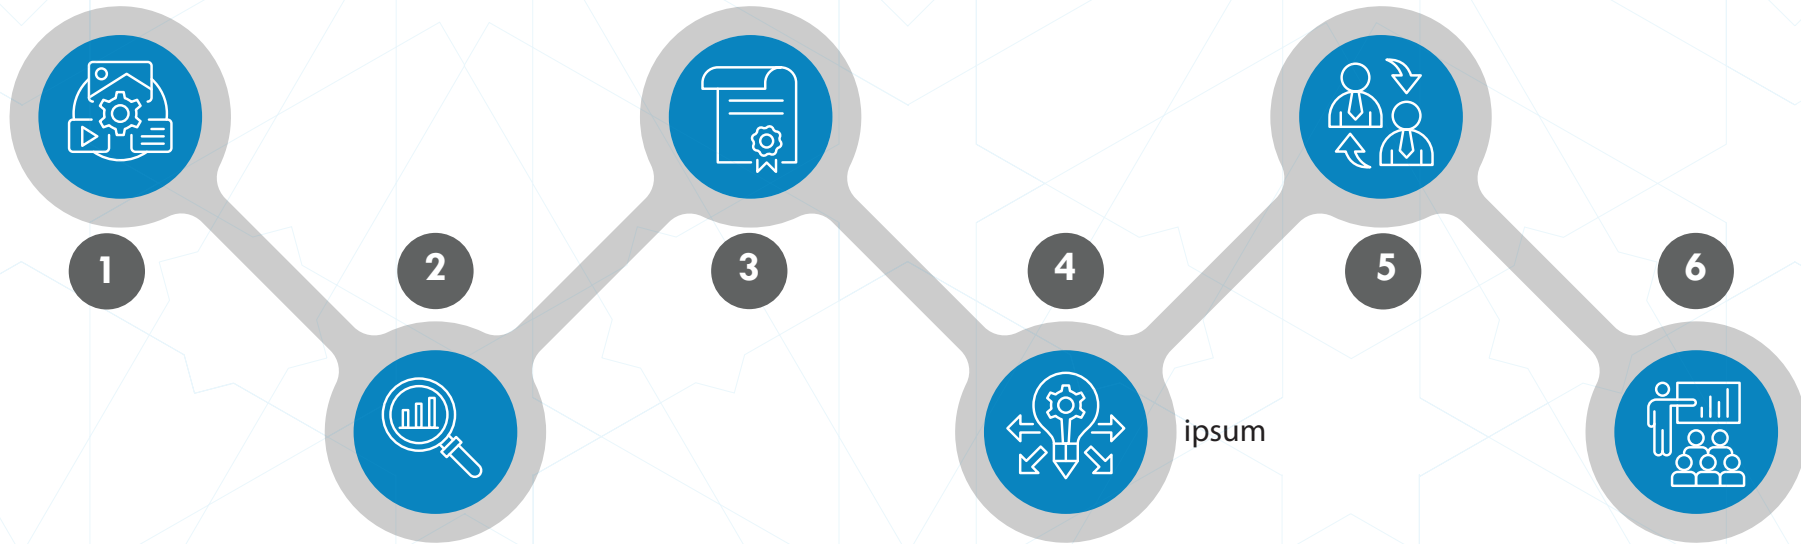

Report Objectives

KSU Sustainability Report aims to achieve several strategic objectives, including:

Highlighting the university's efforts in achieving Sustainable Development Goals

Documenting sustainability-related initiatives and projects

Enhancing transparency in presenting achievements and activities

Supporting data- and indicator-driven decision-making

Strengthening cooperation with local and international entities in the field of

Contributing to the realization of Saudi Vision 2030

KSU Contribution to Achieving Sustainable Development Goals

King Saud University contributes to achieving the seventeen Sustainable Development Goals (SDGs) through multiple initiatives and programs in the areas of education, health, energy, environment, and social development. Some of the key examples of the University's contributions include:

Environment and Energy

- Initiatives to support vulnerable groups.
- Volunteer and community engagement programs for students.

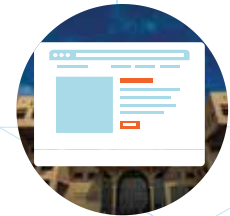

Environment and Energy

- Research in renewable energy.
- Initiatives for energy and water conservation.

Health and Quality of Life

- Health initiatives and community awareness campaigns.
- Advanced medical services provided through the University Medical City.

Education and Scientific Research

- Developing high-quality educational programs.
- Supporting scientific research related to sustainability.

KSU KSU significantly contributes to reducing poverty and promoting social development by implementing a range of community initiatives and volunteer programs that address various segments of society.

The University is committed to utilizing its scientific and human capabilities to support community initiatives that contribute to improving quality of life and strengthening social solidarity. This is achieved through social responsibility programs implemented by various colleges and deanships. The Community Relations Office also works to organize community engagement activities within the University and develop the related policies and procedures, thereby strengthening integration between the University and society and contributing to a positive and sustainable impact.

Activities Examples

- Wafadah Initiative to serve the needy.
- Winter Clothing Campaign.
- Implementation of volunteer programs to serve the community.
- Supporting livestock productivity for farmers.
- Supporting community initiatives that address vulnerable groups.

KSU contributes to supporting food security through advanced scientific research that focuses on developing agricultural technologies and improving food production using sustainable solutions.

Several faculty members have participated in scientific research aimed at developing innovative solutions to address agricultural challenges, such as improving plant growth in saline environments and using biotechnology to increase agricultural production efficiency. Among the most prominent studies are those related to the production of sustainable biofuels and improving plant growth in challenging agricultural environments using nanotechnology and biotechnology.

Activities Examples

- World Food Day.
- MoU between King Saud University and Nestlé Arabia Limited.
- MoU between King Saud University and the Producers and Distributors Association.
- Providing meals for workers at KSU.
- Providing water for workers at KSU.
- A visit to the National Agriculture and Livestock Research.
- Projects to improve animal and plant production at the College of Food and Agricultural Sciences.
- Training farmers on best agricultural practices across different regions of the Kingdom.

The University Medical City is one of the most prominent entities contributing to the achievement of this goal by providing advanced healthcare services and awareness programs that promote public health and improve quality of life. KSUMC offers a wide range of specialized healthcare services, in addition to supporting medical training programs and scientific research across various medical fields. It also implements numerous health initiatives addressing the community, such as health awareness programs and early disease screening campaigns, which contribute to strengthening preventive healthcare and improving the quality of medical services provided to society.

Activities Examples

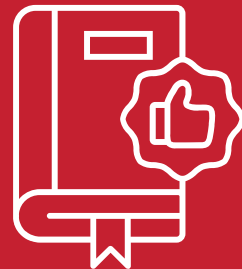

- “A Doctor for Every Family” program, which has served more than 60,000 families.
- MoU with the Chronic Diseases Association in Al-Kharj.
- Organizing the 14th Middle East Conference on Celiac Disease and Gastrointestinal Disorders by the Wheat Allergy (Celiac) Research Chair.
- A scientific workshop on Digital PCR Technology by the Biodiversity and Conservation Research Chair.
- World Diabetes Day.
- World Autism Day.
- Breast Cancer Awareness Campaign.
- World Immunity Month – August 2025.
- World Alzheimer’s Day under the slogan “Don’t Forget Me” – September 2025.
- Launching the “Be Medic” initiative.
- Al-Barakah Feekum” campaign to enhance the quality of life for the elderly.
- Community initiative titled “Your Health During Hajj.”
- The Director of the University Center for Sleep Medicine and Research received the 2025 Arab Physician Award for Scientific Research and Innovation.

KSU seeks to develop an integrated educational system that contributes to preparing qualified human capital capable of supporting sustainable development and addressing future challenges. The University is committed to integrating sustainability concepts into its academic and research programs, in addition to organizing scientific and technological events that develop students' skills and enhance their abilities in the fields of innovation and technology.

The University also organizes AI and emerging technology events with national partners to empower students and faculty to use modern technologies in education and research.

Activities Examples

- KSU, in collaboration with SDAIA, organized the “Athka” event.
- Launch of KSU Strategic Plan for Scientific Journals Management.
- Endowments and Education Forum: Towards Knowledge Sustainability.
- World Arabic Language Day 2025.
- A workshop titled “Applications of Artificial Intelligence.”
- A workshop titled “Design Thinking: Innovate, Experiment, and Start Solutions.”
- A workshop titled “Content Creation through Social Media.”
- Scientific Poster Exhibition.
- A workshop titled “Skills for Managing Quranic Study Circles.”

The University Medical City also contributes to medical education through:

126 accredited training programs 01

8,050 postgraduate trainees 02

A variety of specialized medical fellowship programs 03

KSU supports women's empowerment by providing equal educational opportunities and promoting their participation in academic programs, research activities, and student initiatives. Female students are actively engaged in a wide range of academic programs and disciplines. Student activities and cultural programs also play an important role in strengthening women's role in society and developing their leadership capabilities.

Activities Examples

- Female students from the College of Tourism and Archaeology completing the final year of the Tourism and Hospitality Management Program under the (3+1) academic progression program at IMC University of Applied Sciences in Austria.
- Participation of Women's Health Research Chair in the Second Global Nursing Conference at the Ministry of Defense.
- A lecture entitled: "Your Health After Forty "by Women's Health Research Chair
- Promoting women's participation in the health workforce.
- Supporting female leadership and equal opportunity policies at the University.

KSU seeks to develop advanced systems for managing water resources within the university campus, contributing to water conservation and the protection of natural resources. The Sustainability and Environmental Development Department oversees the implementation of several environmental initiatives aimed at improving water-use efficiency, such as utilizing modern irrigation systems and reusing treated wastewater for irrigating green spaces across the campus.

Activities Examples

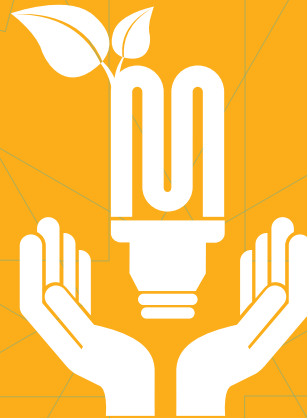

- A workshop on Innovation in Emerging Technologies for Water Desalination and Wastewater Treatment.
- Awareness activities on preserving natural resources and protecting the environment under the initiative “Towards a Clean World.”
- An awareness campaign entitled” Your Awareness Makes a Difference” on the importance of water conservation.
- A training course titled “Irrigation Scheduling.”
- A workshop titled “Irrigation Water Resource Management.
- MoU between KSU and the National Center for Water Efficiency and Conservation, May 2025.

KSU supports the transition toward clean energy through scientific research in renewable energy fields and by implementing initiatives aimed at improving energy efficiency across the university campus. The General Management of Maintenance also works to enhance energy efficiency and reduce resource waste by applying modern energy management systems and improving resource utilization within university facilities.

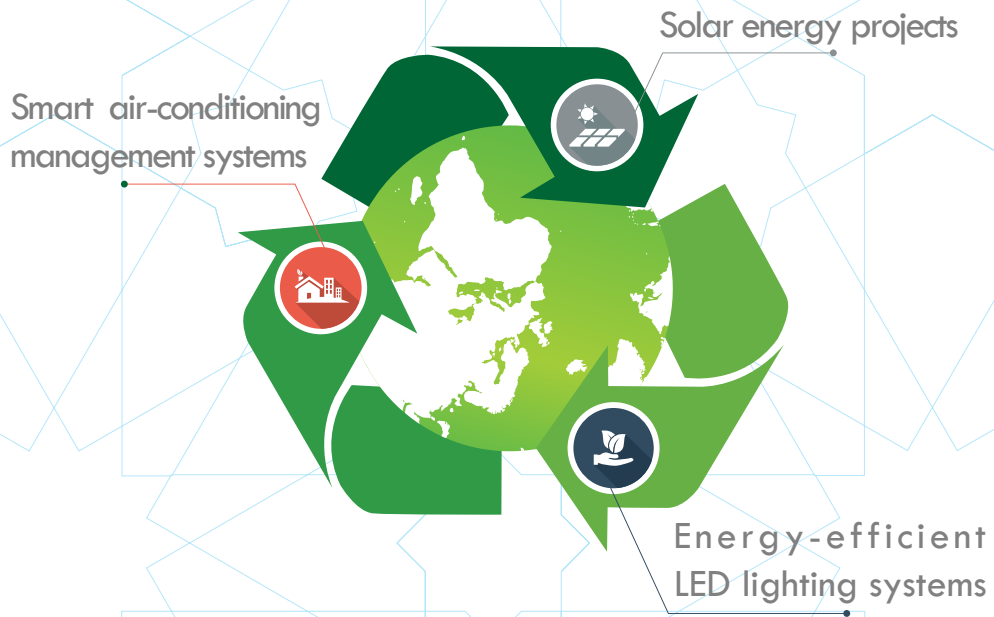

Activities Examples

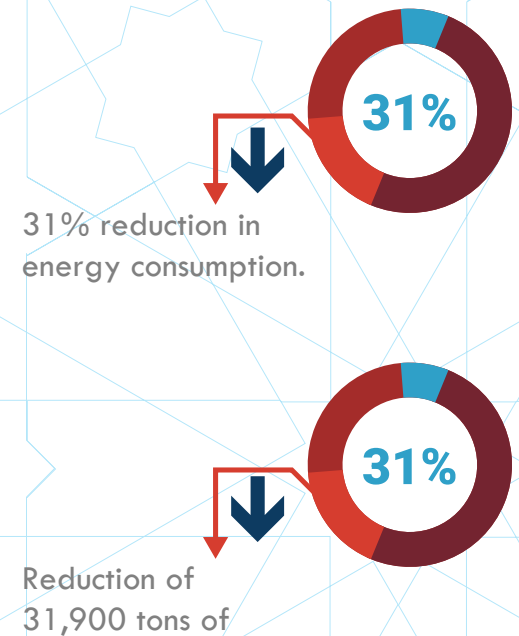

- MoU between KSU and Ceer Company for manufacturing of electric vehicles.
- Signing a support agreement for the “Energy Bridges” project with the Energy Media Association.
- World Clean Energy Day.

KSU KSU supports economic growth and enhancing employment opportunities by preparing qualified human capital capable of contributing effectively to the labor market and achieving sustainable economic development. The University provides specialized educational and training programs aimed at developing the skills of students and graduates, in addition to supporting innovation and entrepreneurship to strengthen the knowledge-based economy.

Activities Examples

- KSU participation in the International Exhibition of Inventions – Geneva.
- Human Resources Leader of the Year Award 2025 for a KSU member.
- The Leader Who Puts People First Award for a KSU member.
- A training course entitled: “Regulating Volunteer and Community Work”.
- A lecture entitled: “The National Platform for Volunteer Work and the Role of Universities in Social Responsibility” at Dar Al Uloom University.
- A workshop entitled: “Developing Cognitive Skills.”
- Training course titled “How to prepare and market a CV professionally?”
- An agreement between KSU and Saudi National Bank.

KSU supports innovation and technological development by strengthening scientific research and developing research infrastructure within the University. The University encourages researchers and faculty members to implement innovative research projects that contribute to finding scientific solutions to environmental and industrial challenges, in addition to supporting interdisciplinary research focusing on emerging technologies and renewable energy. Furthermore, the University's research centers and advanced laboratories contribute to developing technologies and innovations that support sustainable development and strengthen the knowledge-based economy.

Activities Examples

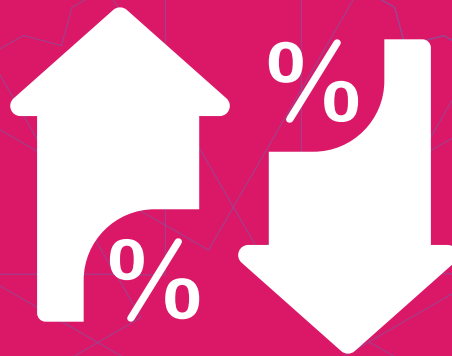

- A framework agreement between King Saud University and Digi Bin Institute of Technology in America.
- MoU between KSU and Ceer Company for manufacturing of electric vehicles.
- Health Innovation Hackathon (Healthon).
- KSU won 8 medals at the Geneva International Exhibition of Inventions 2025.
- A workshop on Innovation in Emerging Technologies for Water Desalination and Wastewater Treatment.
- A workshop entitled: “The Creativity Revolution: Artificial Intelligence Innovates the Future.”
- A workshop entitled: “Jewelry Design and Manufacturing.”
- The Vice Presidency for Projects obtained ISO 9001:2015 Quality Management System certification, recognizing its efforts in implementing quality standards and developing infrastructure and institutional performance.
- MoU between KSU and the Supreme Authority for Industrial Security.

KSU seeks to promote social justice and provide equal educational opportunities for all students from diverse social and cultural backgrounds. The University also supports students through academic programs and student services designed to create an inclusive learning environment that enables everyone to access opportunities for education and development.

In addition, various student activities and educational programs help strengthen cultural and social interaction among students, in order to create a balanced and inclusive educational environment.

Activities Examples

- World Day of Persons with Disabilities.
- World Braille Day.
- A workshop entitled: “Raise Your Voice.”
- A workshop entitled: “The Language of Light in a World of Darkness: Exploring the Braille Method.”
- An event entitled: “Institutional Communication in Achieving Sustainable Development.”
- “Wa’ed Initiative” aimed at promoting positive social and developmental behaviors through communication strategies and their implementation.
- MoU between KSU and National Association of the Blind “Kafeef”.
- MoU between KSU and Qaderoon Association for people with disabilities.
- A ceremony to honor outstanding and talented students with disabilities.

KSU supports sustainable urban development by improving the university environment and enhancing the quality of life within the campus. The Sustainability and Environmental Development Department implements various initiatives aimed at improving the urban environment within the University, such as expanding green spaces and planting trees and native plants that are well adapted to the desert environment. These initiatives also contribute to improving the campus environment and enhancing the attractiveness of the university campus for students, faculty members, and visitors.

Activities Examples

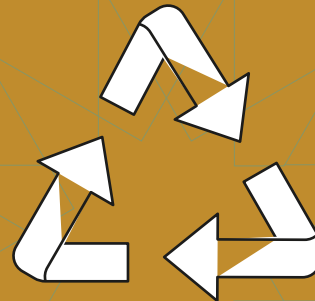

- KSU implemented the Riyadh Memory Project to document the history of the capital and its urban achievements.
- KSU participation in the closing ceremony of the Prince Abdulaziz bin Ayyaf Award for City Humanization – Third Edition.
- “Environment Week 2025” under the slogan “Our Environment is a Treasure.”
- World Soil Day.
- Volunteer initiatives for tree planting across various locations in the university campus.
- A training course entitled: “Community Volunteering in Crises and Emergencies.”
- Electric Vehicle Charging Stations.
- World GIS Day 2025.
- Fourth Saudi Urban Development and Real Estate Forum

KSU strengthens cooperation and partnerships with government institutions, the private sector, and international organizations in order to support the achievement of the Sustainable Development Goals. The Community Relations Office works to develop community partnerships and organize initiatives that enhance collaboration between the University and society, thereby supporting sustainable development and strengthening the University's impact on the community.

Activities Examples

- Artificial Intelligence Initiative to Support Sustainability in collaboration with IBM.
- A cooperation agreement with Namaa Foundation in Malaysia.
- Several local and international agreements during the First Empowerment Training Forum (Tamkeen).
- MoU between KSU and Avalon Pharma (Middle East Pharmaceutical Industries Company).
- Several partnerships of the University Medical City with the Ministry of Health, global pharmaceutical companies, and many research institutions and government entities.
- King Saud University Conference for Sustainable Development 2026 - “Towards a Sustainable Future for coming generations”.

Conclusion

King Saud University reaffirms its continued commitment to supporting the Sustainable Development Goals and strengthening its role as a leading educational and research institution contributing to sustainable development.

The University will also continue to develop its programs and initiatives in the field of sustainability in ways that support Saudi Vision 2030 and help achieve a more sustainable future for generations to come.
